

HENRY QUISPE CABELLO

Full Stack Developer & Systems Analyst

Contact Information

Location: Peru / Lima

Phone: (+51) 918091490

Email: hg305718@gmail.com

Skills

- **Programming Languages:** PHP, JavaScript (ES6+, Vanilla JS), Python
- **Main Frameworks:** Laravel, Vue.js, CodeIgniter, OpenCart
- **Front-end Development:** HTML5, CSS3, Bootstrap, Sass, Tailwind CSS, JavaScript (DOM manipulation, Axios, Fetch API), jQuery, React
- **Databases:** MySQL, PostgreSQL, SQL Server
- **Payment Integration:** Izipay, Culqui, Pago Efectivo (REST API, webhook integration)
- **Version Control:** Git, Bitbucket
- **Cloud Services:** Amazon S3, Amazon EC2, Amazon Rekognition, Face++
- **Development Tools:** Composer, NPM, Webpack, Vite

Additional Experience

E-commerce and CMS development with a focus on backend and functionalities.

Education

Systems Engineering - Universidad Cesar Vallejo (UCV)

Languages

- Spanish: Native
- English: Intermediate

Professional Summary

Full Stack Developer with over 5 years of experience in developing custom solutions using Laravel and Vue.js. Expert in both backend and frontend, I have led E-commerce and ERP projects, integrating technologies like Amazon S3, Amazon Rekognition, and Face++. Strong experience in code optimization, API development, microservices, and payment gateways (Izipay, Culqui, Pago Efectivo). Proficient in MySQL, PostgreSQL, and SQL Server databases, with a focus on efficiency and usability. Familiar with React and Node.js, I use tools like Git and Bitbucket for effective version control. Capable of managing both frontend (HTML5, CSS3, Tailwind CSS) and backend development, ensuring robust and scalable solutions.

Summary of Work Experience

01/2020 – Present **Dezain Studios** - *Full Stack Developer & Systems Analyst*

- Designed scalable and maintainable software architectures.
- Provided technical guidance to the team on best practices and coding standards.
- Planned system adaptability, minimizing rework and downtime.
- Proposed and evaluated suitable technologies, considering performance and cost.
- Created documentation on architecture and design decisions.
- Analyzed system performance, identifying bottlenecks and proposing optimizations.

09/2019 – 01/2020 AppVentures – *Full Stack Developer*

- Participated in designing scalable software architectures.
- Collaborated with the team on following best practices and code review.
- Assisted in planning adaptable architectures.
- Contributed to proposing suitable technologies for projects.
- Created documentation on architecture and design decisions.
- Identified bottlenecks and proposed performance improvements.

Notable Projects

- Optimania, Witches Calzados, Puro Amor Shop, Tortas Lucas, CompuAndina, Beata Woznica, All4Safe, etc.
